Colonial Secretary's Office,  
Auckland, 29th November, 1861.  
The following "Notice to Mariners" is  
published for general information.  
WILLIAM FOX.

NOTICE TO MARINERS.

SOUTH PACIFIC OCEAN.  
OFF STEWART ISLE, NEW ZEALAND.  
Hydrographic Office, Admiralty.  
London, 15th August, 1861.

It appears from an examination of the  
Weather Book of the ship *Bruce*, Thomas  
Meiklejohn, Commander, in her passage  
from Otago by the South of New Zealand  
to Calcutta, in November last, when pas-  
sing the South-east extreme of South or  
Stewart Island, discovered a dangerous

Reef which is not laid down in the Admi-  
ralty or any other Charts, or noticed in the  
New Zealand Pilot or Sailing Directions.

This danger which is described as two  
low rocks from 3 to 6 feet high, and close  
together, on which the sea breaks heavily,  
lies in the direct track of vessels closely  
rounding Stewart Island in proceeding to  
or from the Southern settlements of New  
Zealand.

Its position, which appears to have been  
determined with some accuracy, is as fol-  
lows:—

7 1-tenth miles, E. by N.  $\frac{3}{4}$  N. from  
Owen Island, off Lord's River.

5 1-tenth miles, E. by N.  $\frac{1}{4}$  N. from the  
extreme of the Break Sea Isles.

3  $\frac{1}{4}$  miles, E. by S.  $\frac{3}{4}$  S. from Wreck  
Reef off Port Adventure.

7  $\frac{1}{4}$  miles, S. E.  $\frac{1}{4}$  E. from East Head,  
north of Port Adventure.

Or, in latitude 47° 7' 35" S., and long.  
168° 21' 35" E.

Soundings, though tried for, were not  
obtained in its neighbourhood, from the  
rapid rate of sailing of the ship in passing  
the danger.

*Caution.*—It is creditable to Captain  
Meiklejohn to have entered the discovery  
of this Reef in his Weather Book; but it  
is greatly to be regretted that he did not  
take some steps immediately on his arrival  
at Calcutta or in England to make public  
the existence of this very serious danger  
which lies but little out of the sailing  
track of ships bound to the Southern set-  
tlements of New Zealand.

Had not the remark been seen by Rear-  
Admiral Fitz Roy (who was searching  
this book for Meteorological facts, and at  
once transmitted it to the Admiralty for  
publication) this reef might not have been  
heard of until it had caused the wreck of  
a vessel. On being applied to for further  
information, Captain Meiklejohn readily  
sent up his original chart on which the  
reef was marked at the time, and there  
can be little doubt of its existence; Mas-  
ters of vessels are therefore warned to  
keep a good look out in this neighbourhood.  
They are further requested on the dis-  
covery of any danger to report the same  
immediately on arriving at the first port,  
in order that other vessels may be put on  
their guard, and for the general benefit of  
the Mariner.

[All bearings are Magnetic. Variation,  
16° 20' East in 1861.]

By command of their Lordships,  
JOHN WASHINGTON,  
Hydrographer.

This Notice affects the following Admi-  
ralty Charts:—New Zealand, General,  
No. 1212; Foveaux Strait and South Is-  
land, No. 2533; New Zealand Plans, No.  
2542; Pacific Ocean, General, No. 2683,  
and Sheet 10, No. 2468; and New Zea-  
land Pilot, p. 224.
