[No. 6.]

PROCLAMATION.

By His Excellency SIR GEORGE GREY, a Knight Commander of the Most Honorable Order of the Bath, Governor-in-Chief and Commander-in-Chief in and over the Islands of New Zealand, and Governor of the Provinces of New Ulster and New Munster, and Vice Admiral of the same, &c., &c., &c.

WHEREAS by an Ordinance enacted by the Lieutenant Governor of New Zealand, with the advice and consent of the Legislative Council thereof, Session VII, No. 7, intituled "An Ordinance for the Regulation of Prisons," it is enacted that it shall be lawful for His Excellency the Governor, from time to time, as to him shall seem meet by Proclamation, to declare any *House, Building, Enclosure or Place* to be a Public Gaol, and from and after the publication of any such *Proclamation* such *House, Building, Enclosure or Place*, shall be deemed and taken to be a *Public Gaol*.

And Whereas it is desirable that the *Building* now used as a *Lockup* at the *Police Station* on *Lambton Quay*, in the *Town of Wellington*, in the *Province of New Munster*, should be proclaimed to be a *Public Gaol* of the *Colony*.

Now, therefore, I the Governor-in-Chief of the Islands of New Zealand, do hereby Pro-

CLAIM and DECLARE that the *Building aforesaid* shall be deemed and taken to be one of the *Public Gaols* of the Colony of New Zealand.

Given under my hand, and issued under the Public Seal of the Islands of New Zealand, at Government House, at Wellington, in the (L.S.) Province of New Munster, in the Islands aforesaid, this Sixteenth day of February, in the year of our Lord One thousand eight hundred and fifty-three.

G. GREY,
Governor-in-Chief.

By His Excellency's command,

ALFRED DOMETT,
Civil Secretary.

GOD SAVE THE QUEEN.

Civil Secretary's Office,
25th February, 1853.

HIS EXCELLENCY THE GOVERNOR-IN-CHIEF has been pleased to direct that the following Letter should be published for general information.

By His Excellency's command,

ALFRED DOMETT,
Civil Secretary.

Per ship *Minerva*.

Blackwall Yard, London,
30th September, 1852.

SIR,—We have the honor of addressing your Excellency, as the head of the Government of New Zealand, for the purpose of submitting to you a matter in which we are personally interested, but which appears to us of greater importance to the Colony. It may be convenient if we begin by stating the nature of our personal interest in the subject.

Circumstances have induced us to resolve, after due consideration, to enter fully and systematically into the business of the Passenger Trade to New Zealand. These are—

1st. The surrender by the New Zealand Company to the Crown, of the Charter under which they were the Instrument for the greater part of the Emigration from the Mother Country to that Colony.

2nd. The more recent transfer of the functions and powers of the Canterbury Association, whereby the proceedings of that body, as an important and highly valuable Instrument of Emigration, are brought to an end;—and

3rd. The Parliamentary legislation of last Session, which by bestowing very large powers of local self Government upon the Colony of New Zealand in general, and upon the six Provinces into which it is divided by the new Constitution, holds out a prospect, that the attractiveness of New Zealand to Emigrants of all classes, and more especially of the higher classes will be much increased, and the demand for Passenger Ships be proportionately augmented. It thus appeared that the Shipping arrangements which heretofore facilitated New Zealand Emigration, and made it so respectable, were coming to an end at the moment when the Colony had acquired an increased interest in them, and their continuance and extension had become of greater importance to the Colony. It seemed that the supply was likely to cease at the very time when the demand promised to be greater than ever.

Prompted by these considerations we have determined to take up and carry on the Shipping operations for Emigration to New Zealand. Arrangements have consequently been made, by which Mr. Aylmer, (who succeeded Mr. Bowler as Superintendent of Emigration and Shipping to the Canterbury Association) will establish at the late office of that body a general Emigration Office for New Zealand, in exclusive connection with our firm as Ship Owners. At this office, and precisely as heretofore, intending Colonists of all classes will be able to obtain information, advice, and assistance; and in due proportion to the demand for passage, first class Ships will be despatched

by us with the same strict regard to the safety and comfort of Passengers during the voyage, and punctuality to the time fixed for sailing, as bestowed by the Canterbury Shipping arrangements.

Your Excellency will understand that we can have no object in ministering to the Emigration wants of any one of the New Zealand Settlements in particular. Differing in this respect from the Canterbury Association, we shall direct our attention to all the six Provinces which the new Constitutional Act calls into existence. It will be Mr. Aylmer's and our endeavour and wish that each Province shall share equally with all the rest in the benefits which these arrangements may afford. Just at present, probably, it may not be in our power to send ships to a single port only, so as to secure for each Province the advantage of direct communication from England, but as soon as ever the demand for passage to each port shall justify that course, we shall not fail to pursue it. In the meantime, and so long only as the demand for shipping shall be insufficient to justify our sending them to a single port, but sufficient to require a ship for two or more, we shall send ships to more than one port, taking care that such Province shall in its turn, as far as possible, be made the first place of destination.

We assume that the Government of each Province and the General Legislature, including your Excellency, will perceive that it is in their own power by raising funds for the promotion of Emigration from the Mother Country, to make it the interest of British ship owners to send their vessels always to a single port, and therefore to each port, direct from England. Either each Province, if all the six should obtain the management of their own waste land, or the General Legislature on behalf of each Province, if the law should remain as it is, might provide funds for direct Emigration to each of the six ports. On this point we are induced to add, that if the authorities of New Zealand, whether in the General or Provincial Governments, should be disposed to raise funds in this country for the purpose of Emigration, we should be glad, and hereby beg to offer to your Excellency our services to afford any assistance in our power towards the introduction of New Zealand Government securities into the British money market, or other means by which we could be useful in promoting the interest of the Colony.

The foregoing statement of our intentions and views with regard to New Zealand Emigration will sufficiently introduce a suggestion which we venture to make through your Excellency to the Legislature of the Colony. In carrying on the passenger trade to the Australian Colonies, and in some measure also to

New Zealand, damage and all of which the cost of payment to Emigrants, the command with regard to with seamen. of British ships their passage port in India, partially or w have entered i the whole voya present afford a or remedy such be presumptuo form positively remedy; but Durham was G Legislative Cou his Governmen short time the method of dea grievance at Q which apply to the legislature equally successf assure your E intention of en cally in the Ne subject is of th one to which lency's early at from us, your necessarily an interested in th

New Zealand, ship owners are exposed to damage and often to the most serious losses, all of which virtually in the long run enhance the cost of passage, and operate as an impediment to Emigration, by the difficulty which the commanders of their vessels experience with regard to the enforcement of contracts with seamen. Upon the arrival in the Colony of British ships destined after the discharge of their passengers and cargo to some distant port in India, or elsewhere, the crews either partially or wholly desert, and though they have entered into the clearest engagements for the whole voyage, the Colonial law does not at present afford adequate means either to prevent or remedy such breaches of contract. It would be presumptuous in us to offer, or even to form positively an opinion on the most suitable remedy; but we are informed that when Lord Durham was Governor General in Canada, his Legislative Council devised, and the officers of his Government carried into effect during the short time their authority lasted a sufficient method of dealing with and correcting this grievance at Quebec; and on general grounds which apply to all countries, we suppose that the legislature of New Zealand would be equally successful in a similar attempt. We assure your Excellency that with our present intention of engaging largely and systematically in the New Zealand passenger trade, this subject is of the deepest importance to us, and one to which we beg to request your Excellency's early attention. Having this assurance from us, your Excellency will see at once how necessarily and how deeply the Colony is interested in the question.

We have the honor to be,

Sir,

Your Excellency's most obedient
humble servants,

(Signed) MONEY, WIGRAM & SONS.

We beg your Excellency will understand that we shall willingly entertain, with every wish to carry into effect, any other Monetary arrangement you and the Legislative Council may think it desirable to propose to us for the benefit of the Colony.

(Signed) MONEY, WIGRAM & SONS.

Colonial Secretary's Office,
Wellington, 17th February, 1853.

HIS EXCELLENCY THE GOVERNOR has been pleased to direct the publication of the following Report and Returns for general information.

By His Excellency's Command,
ALFRED DOMETT,
Colonial Secretary.

Whanganui, 8th February, 1853.

SIR,—In forwarding for the information of His Excellency the Governor, the accompanying Returns of Diseases treated in the Native Hospital at Whanganui, during the year 1852, I have but little to add to what has been already communicated in my several Reports since the opening of the Institution.

In order to explain the comparatively large number of Europeans treated as out patients, I beg to state that, in consequence of there being no private medical practitioner in the town beside myself, I could not refuse relief without having my motives liable to misconstruction, but until medical men are more numerous, if applications of this kind continue, it will be just to apply to them the rule by which the admissions into the Hospital are governed, viz; a payment according to the means of the applicant.

The preponderance of disease in the Aboriginal over the immigrant population is still remarkable; that it will diminish in proportion as the personal comforts of the class increase, is very evident, and that diseases hitherto unknown in these Islands, but which prevail in other countries, will be imported with the increase of foreign population there can be no doubt. I have in a former paper remarked on the first appearance of several maladies new to the District, and the passed year has witnessed the advent of the first case of small pox, but judging from the mild character of diseases in this country and the powerful effect of climate, there is no reason to apprehend that attention to those ordinary sanitary regula-

tions, which are necessary for the comfort of society and are already provided by various acts of the colonial legislature, will be insufficient to sustain for Whanganui that character of salubrity, which, in common with the whole of New Zealand, it has hitherto, so well deserved.

In investigating the agencies likely to affect the increase of the Aboriginal race, I have found it impossible to arrive at any other conclusion, at least, so far as the population of this District is concerned, than that the numerous deaths in infancy and early youth, fully account for any retrogression, and from extensive inquiries made in other parts of the Colony, by a gentleman of distinguished position and self devoted to the native cause, it would appear that, the same observations are more generally applicable than has been hitherto supposed. Here we may perceive the benefit likely to follow the arrangements now in progress by the Government for the establishment of Native Schools; by transplanting at an early age a portion of the rising generation, the general waste may, to a great extent be repaired.

As connected with public *hygiene*, I must remark that, at no period since the first formation of this Settlement, has a better feeling existed between the two races; peaceable and contented, the Natives equally with the Europeans, are steadfastly employing themselves in developing the resources of the District, and on every side may be observed evidences of industry and prosperity; the constant influx of Europeans must at no distant date cause the Settlement to stand prominently forward as one of the most flourishing in the Colony.

I have the honor to be,

Sir,

Your most obedient Servant,

GEORGE REES,

Colonial Surgeon,
Whanganui.

The Hon. Colonial Secretary.
